

REPORT

TITLE: SQL PRACTICE SESSION

DATE: MARCH 27, 2026

TIME: 4:00 PM TO 6:00 PM

VENUE: SEMINAR HALL, EED

ORGANIZED BY: IEEE STUDENT BRANCH

REPORT AUTHOR: PRIYANSHU NAUTIYAL

EVENT OVERVIEW

The IEEE Student Branch organized a SQL Practice Session at the EED Seminar Hall on March 27, 2026. The session was commenced by the final year Branch Chair Jiyanshi Batra and Creative Media Head Paras Dhiman, who introduced the attendees to SMMS and MySQL as the primary tools for the session. The introductory segment covered the fundamentals of ER diagrams, database architecture, and table structure, establishing the conceptual groundwork for the hands-on work that followed.

The technical segment progressed into the practical implementation of Data Definition Language (DDL), wherein a base database was created with structured tables and subsequently connected to CSV data files. Following the DDL segment, participants engaged in a practice session covering Data Manipulation Language (DML) commands, working directly with the created database to formulate and execute queries.

Practice material comprising an ER diagram, relevant data files, and a set of practice questions has been shared with all attendees. All participants are advised to attempt the provided questions prior to the upcoming competition. For any doubts or clarifications regarding the material, participants may contact the session organizer directly. Interest in a follow-up session covering nested queries, joins, and advanced SQL topics has been noted; participants wishing to attend may register their interest by reaching out to the organizer.

The following members from IEEE Student Branch were present:

- Jiyanshi Batra
- Paras Dhiman
- Rachita Pant
- Harshit Giri
- Ojasvi Thapa
- Anurag Gupta

The following volunteers were present:

- Naval Budhlakoti
- Ahana
- Rahul Joshi
- Nikhil Suyal
- Nitin Rawat
- Vaibhav Pokhriyal
- Daksh Kandpal
- Priyanshu Nautiyal
- Aman
- Priya Maurya
- Yash Saini
