

A Tinkercad Workshop

Conducted on 27th March 2026

WORKSHOP OVERVIEW

1. ABOUT TINKERCAD WORKSHOP

Tinkercad Workshop is a hands-on learning session where participants learn to design, simulate, and build basic electronic and 3D projects using **Tinkercad**, Autodesk's beginner-friendly online platform.

2. Workshop Objectives

By the end of the workshop, participants should be able to:

1. Understand the basics of Tinkercad.
2. Design simple 3D models.
3. Create and simulate electronic circuits.
4. Program an Arduino using basic code.
5. Develop a small project or prototype.

3. What You Can Learn

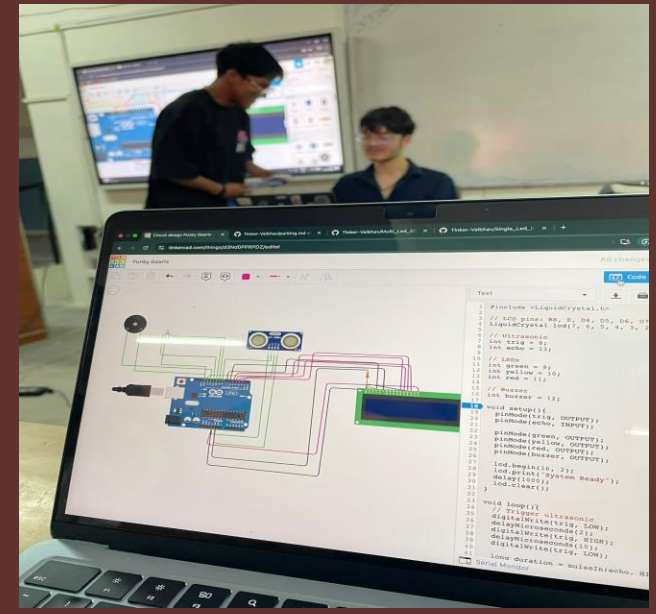

1. **3D Design:** Create and modify 3D objects using basic shapes.
2. **Circuit Design:** Build virtual circuits using components like LEDs, resistors, switches, and sensors.
3. **Arduino:** Learn basic Arduino programming and control electronic components.
4. **Simulation:** Test circuits virtually before building them physically.
5. **Prototyping:** Turn ideas into working prototypes without needing physical hardware.

Members present during workshop :-

- | | |
|----------------------|------------------|
| 1.Ashmit rana | 8.Yash Saini |
| 2. Uday pant | 9.Priyanshu Shah |
| 3.Pranjul | 10.Rishika |
| 4.Vaibhav Pokhriyal | 11.Priya Maurya |
| 5.Rahul Joshi | 12.Khushi Arya |
| 6.Priyanshu Nautiyal | 13.Ayush Dilwan |
| 7.yash Saini | 14.Aadarsh |

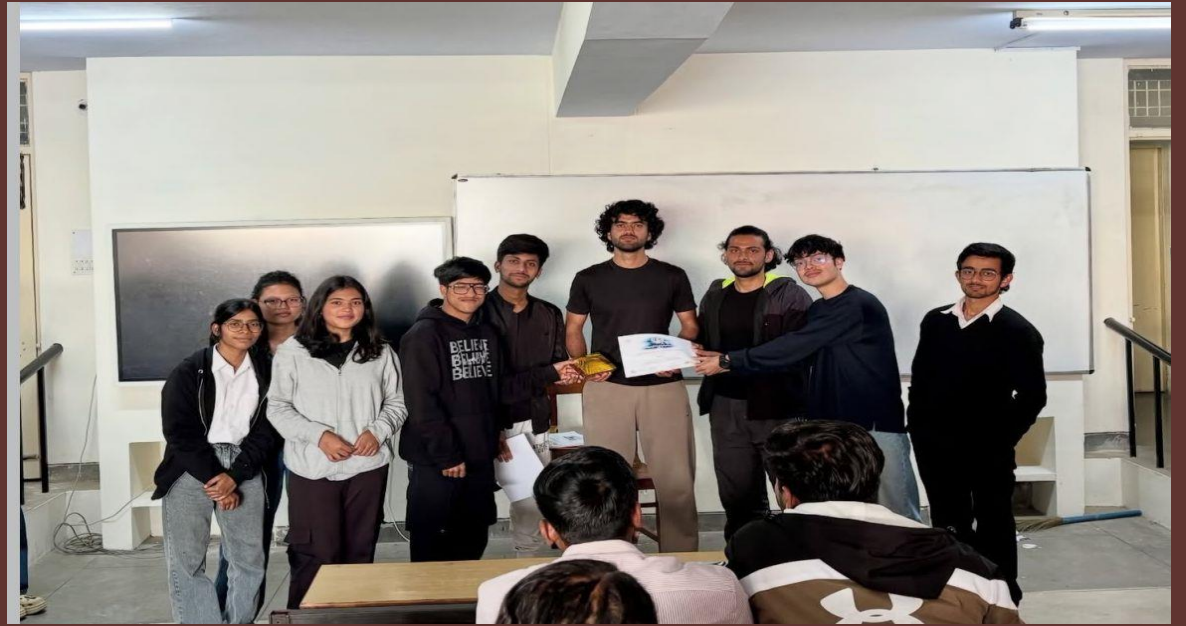

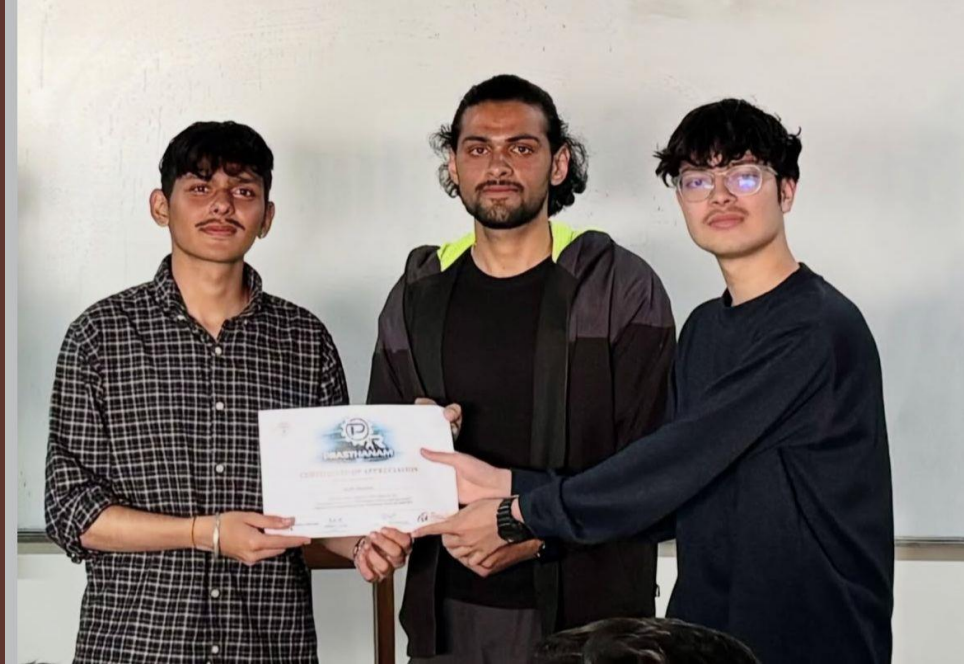

A hands-on workshop introducing students to 3D design, electronics, Arduino, and circuit simulation using Tinkercad. It helps participants learn, experiment, and build innovative projects virtually.

THE TINKERCAD CIRCUIT DESIGNING & SIMULATION EVENT

WINNERS

THANK YOU!
